

Select the desired My Space page and click *External chats* button

Select Discord messenger.
We will generate a link to connect the bot to your server

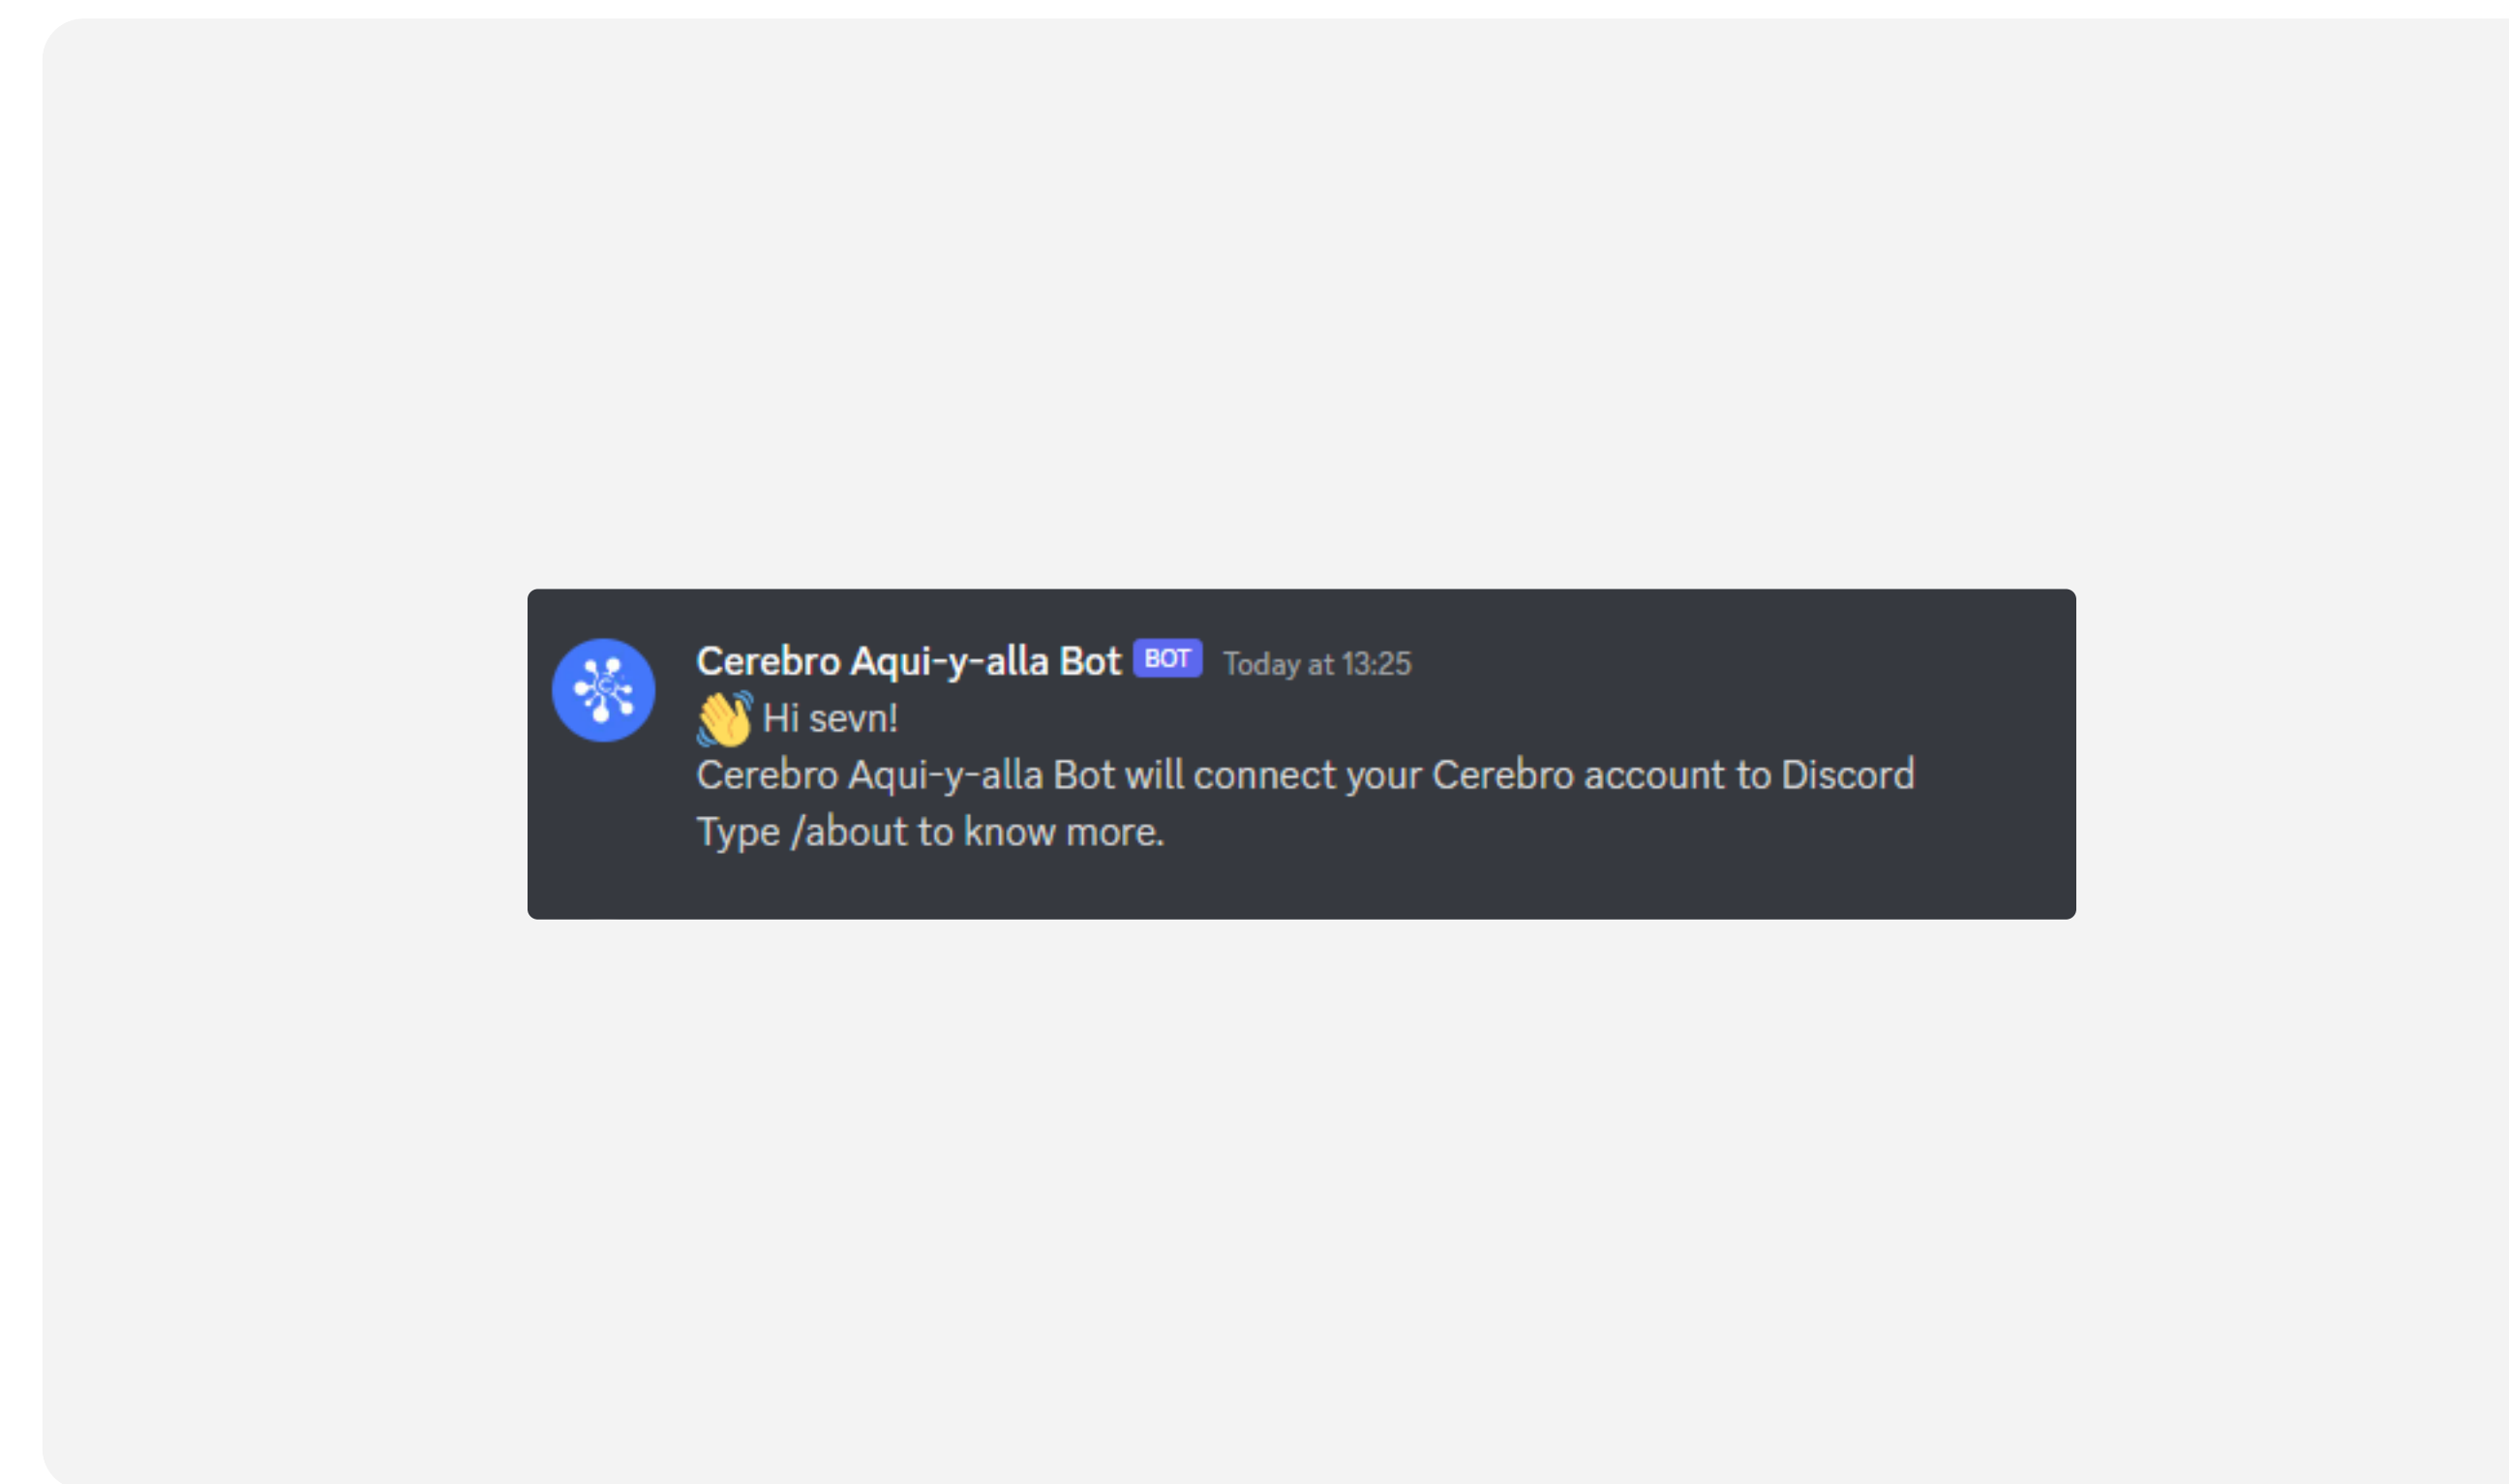

Follow the link and select the server where you want to add the bot

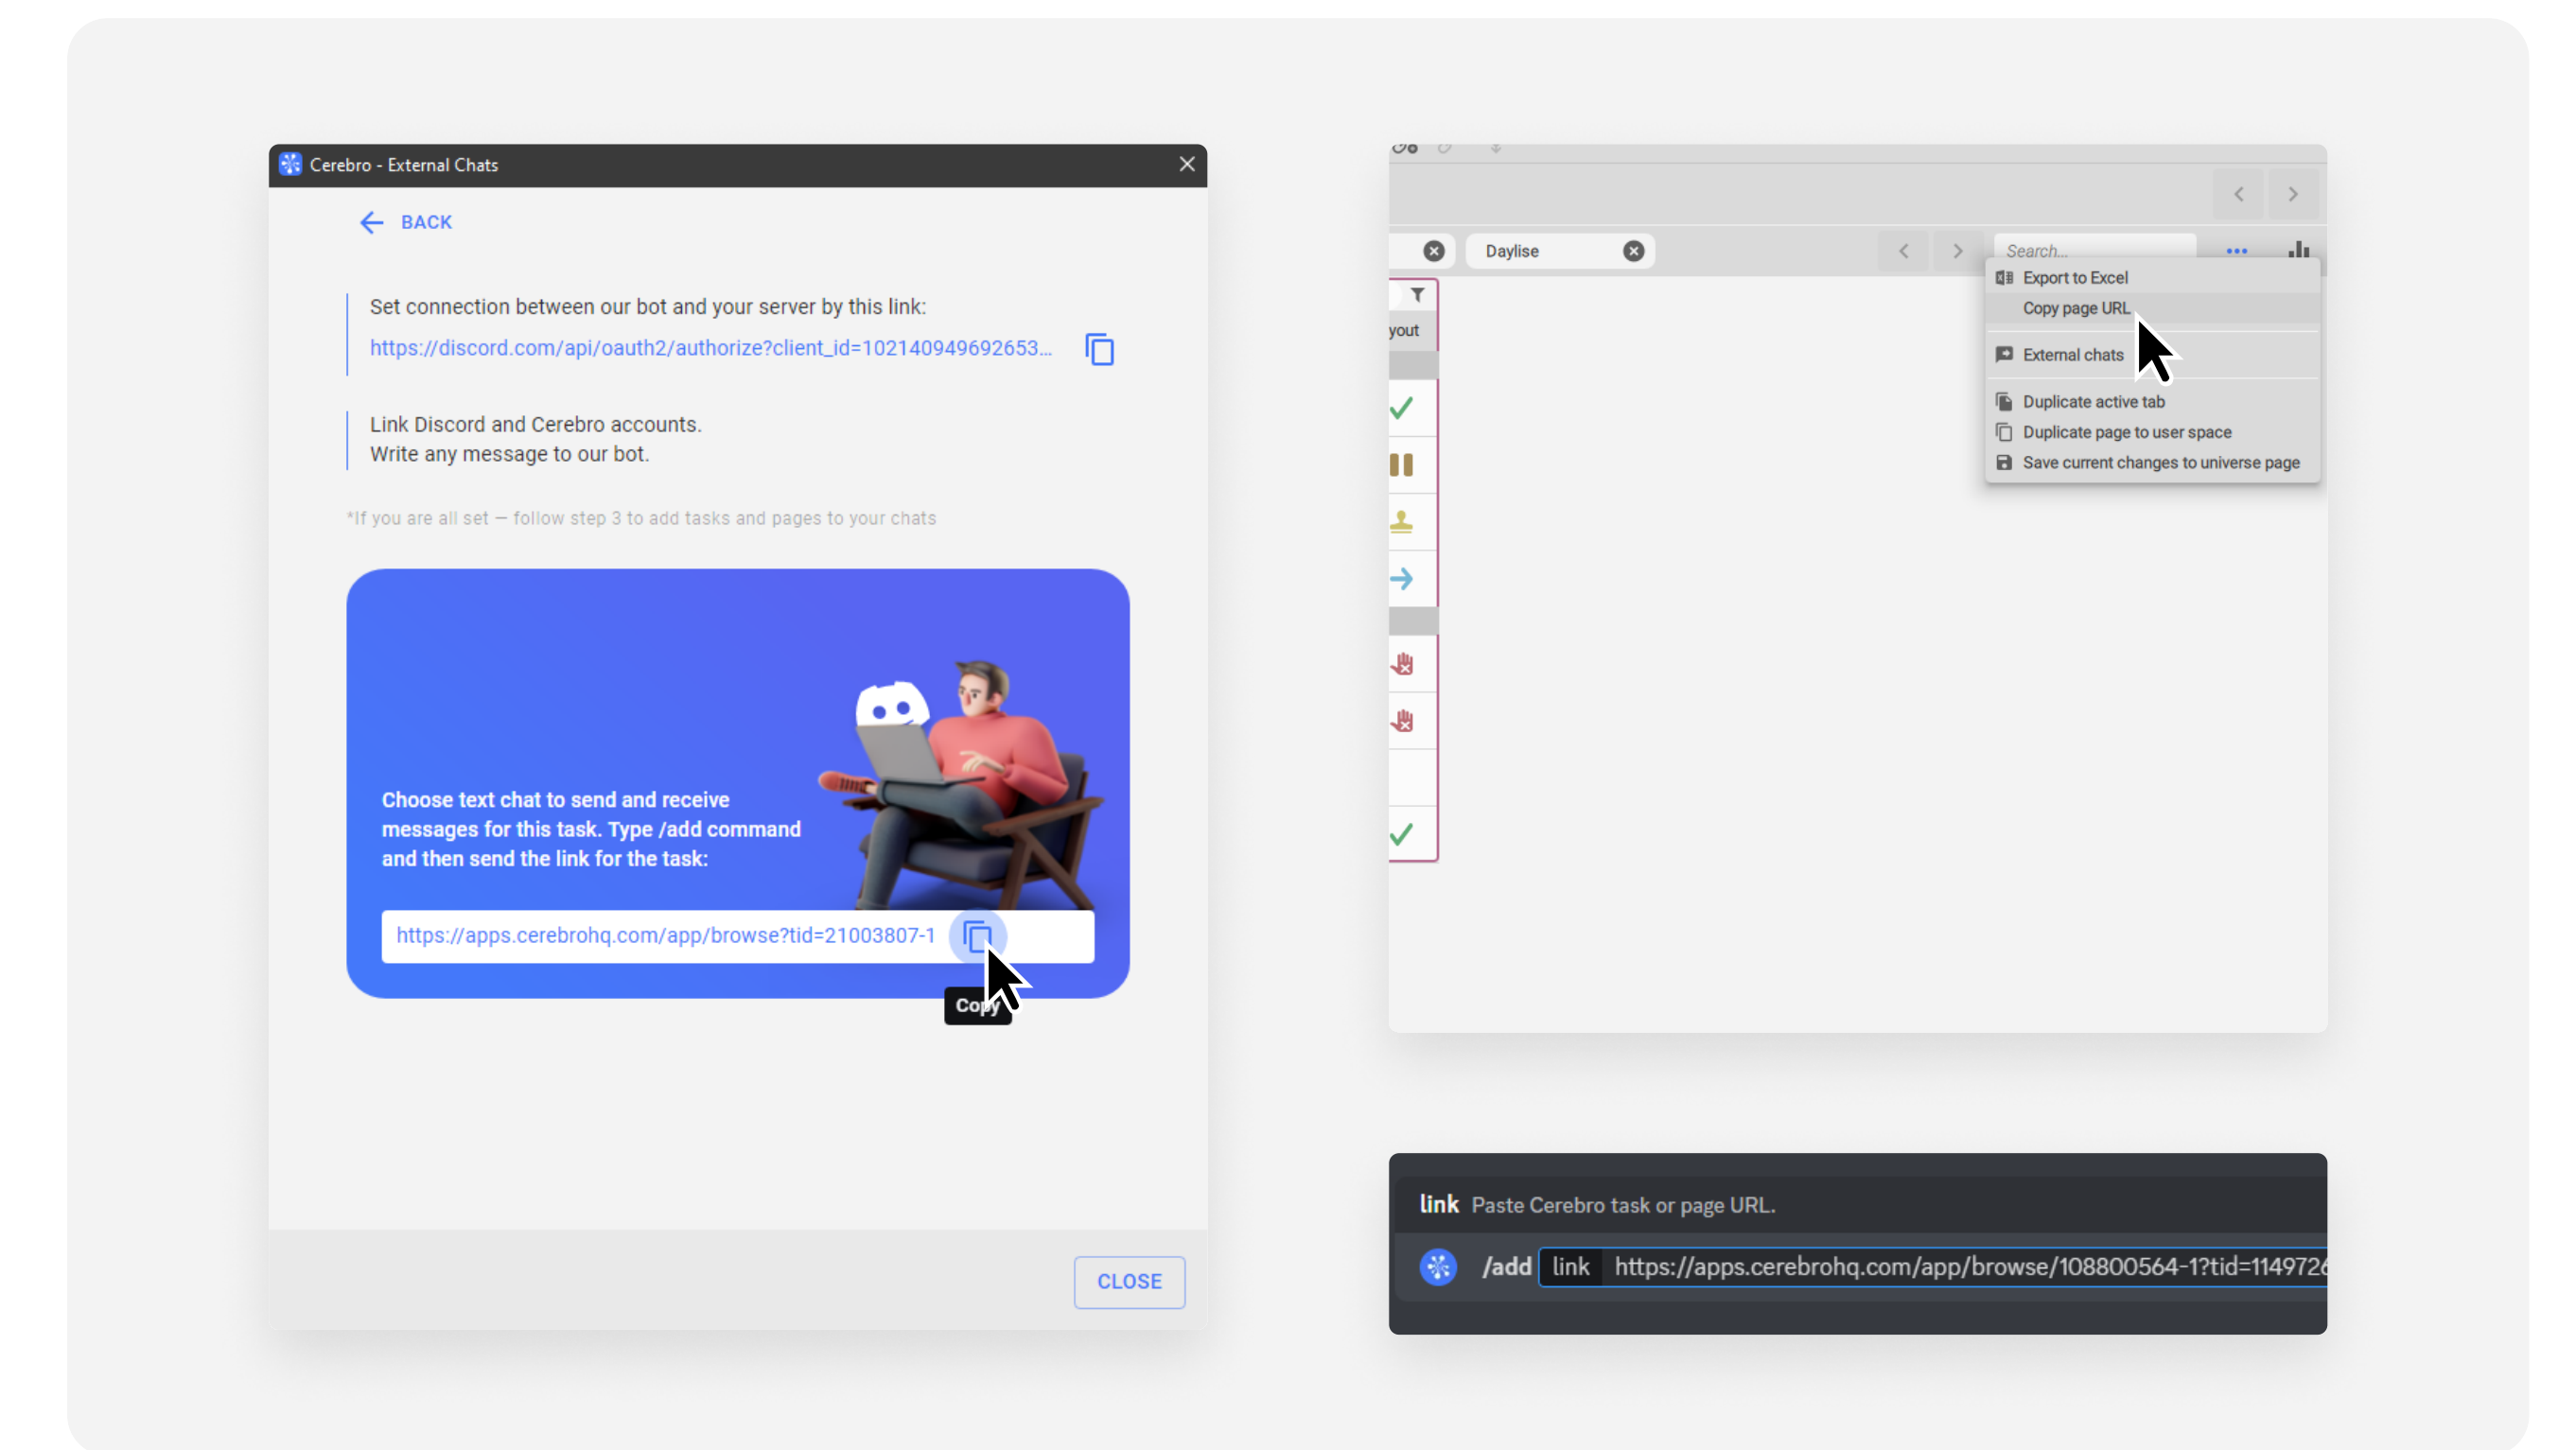

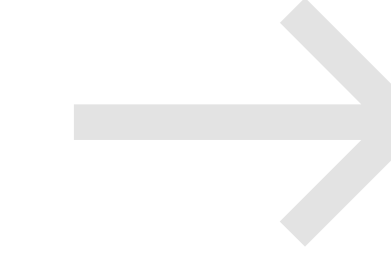

Connect your Cerebro profile to your Discord account and click *Authorize*

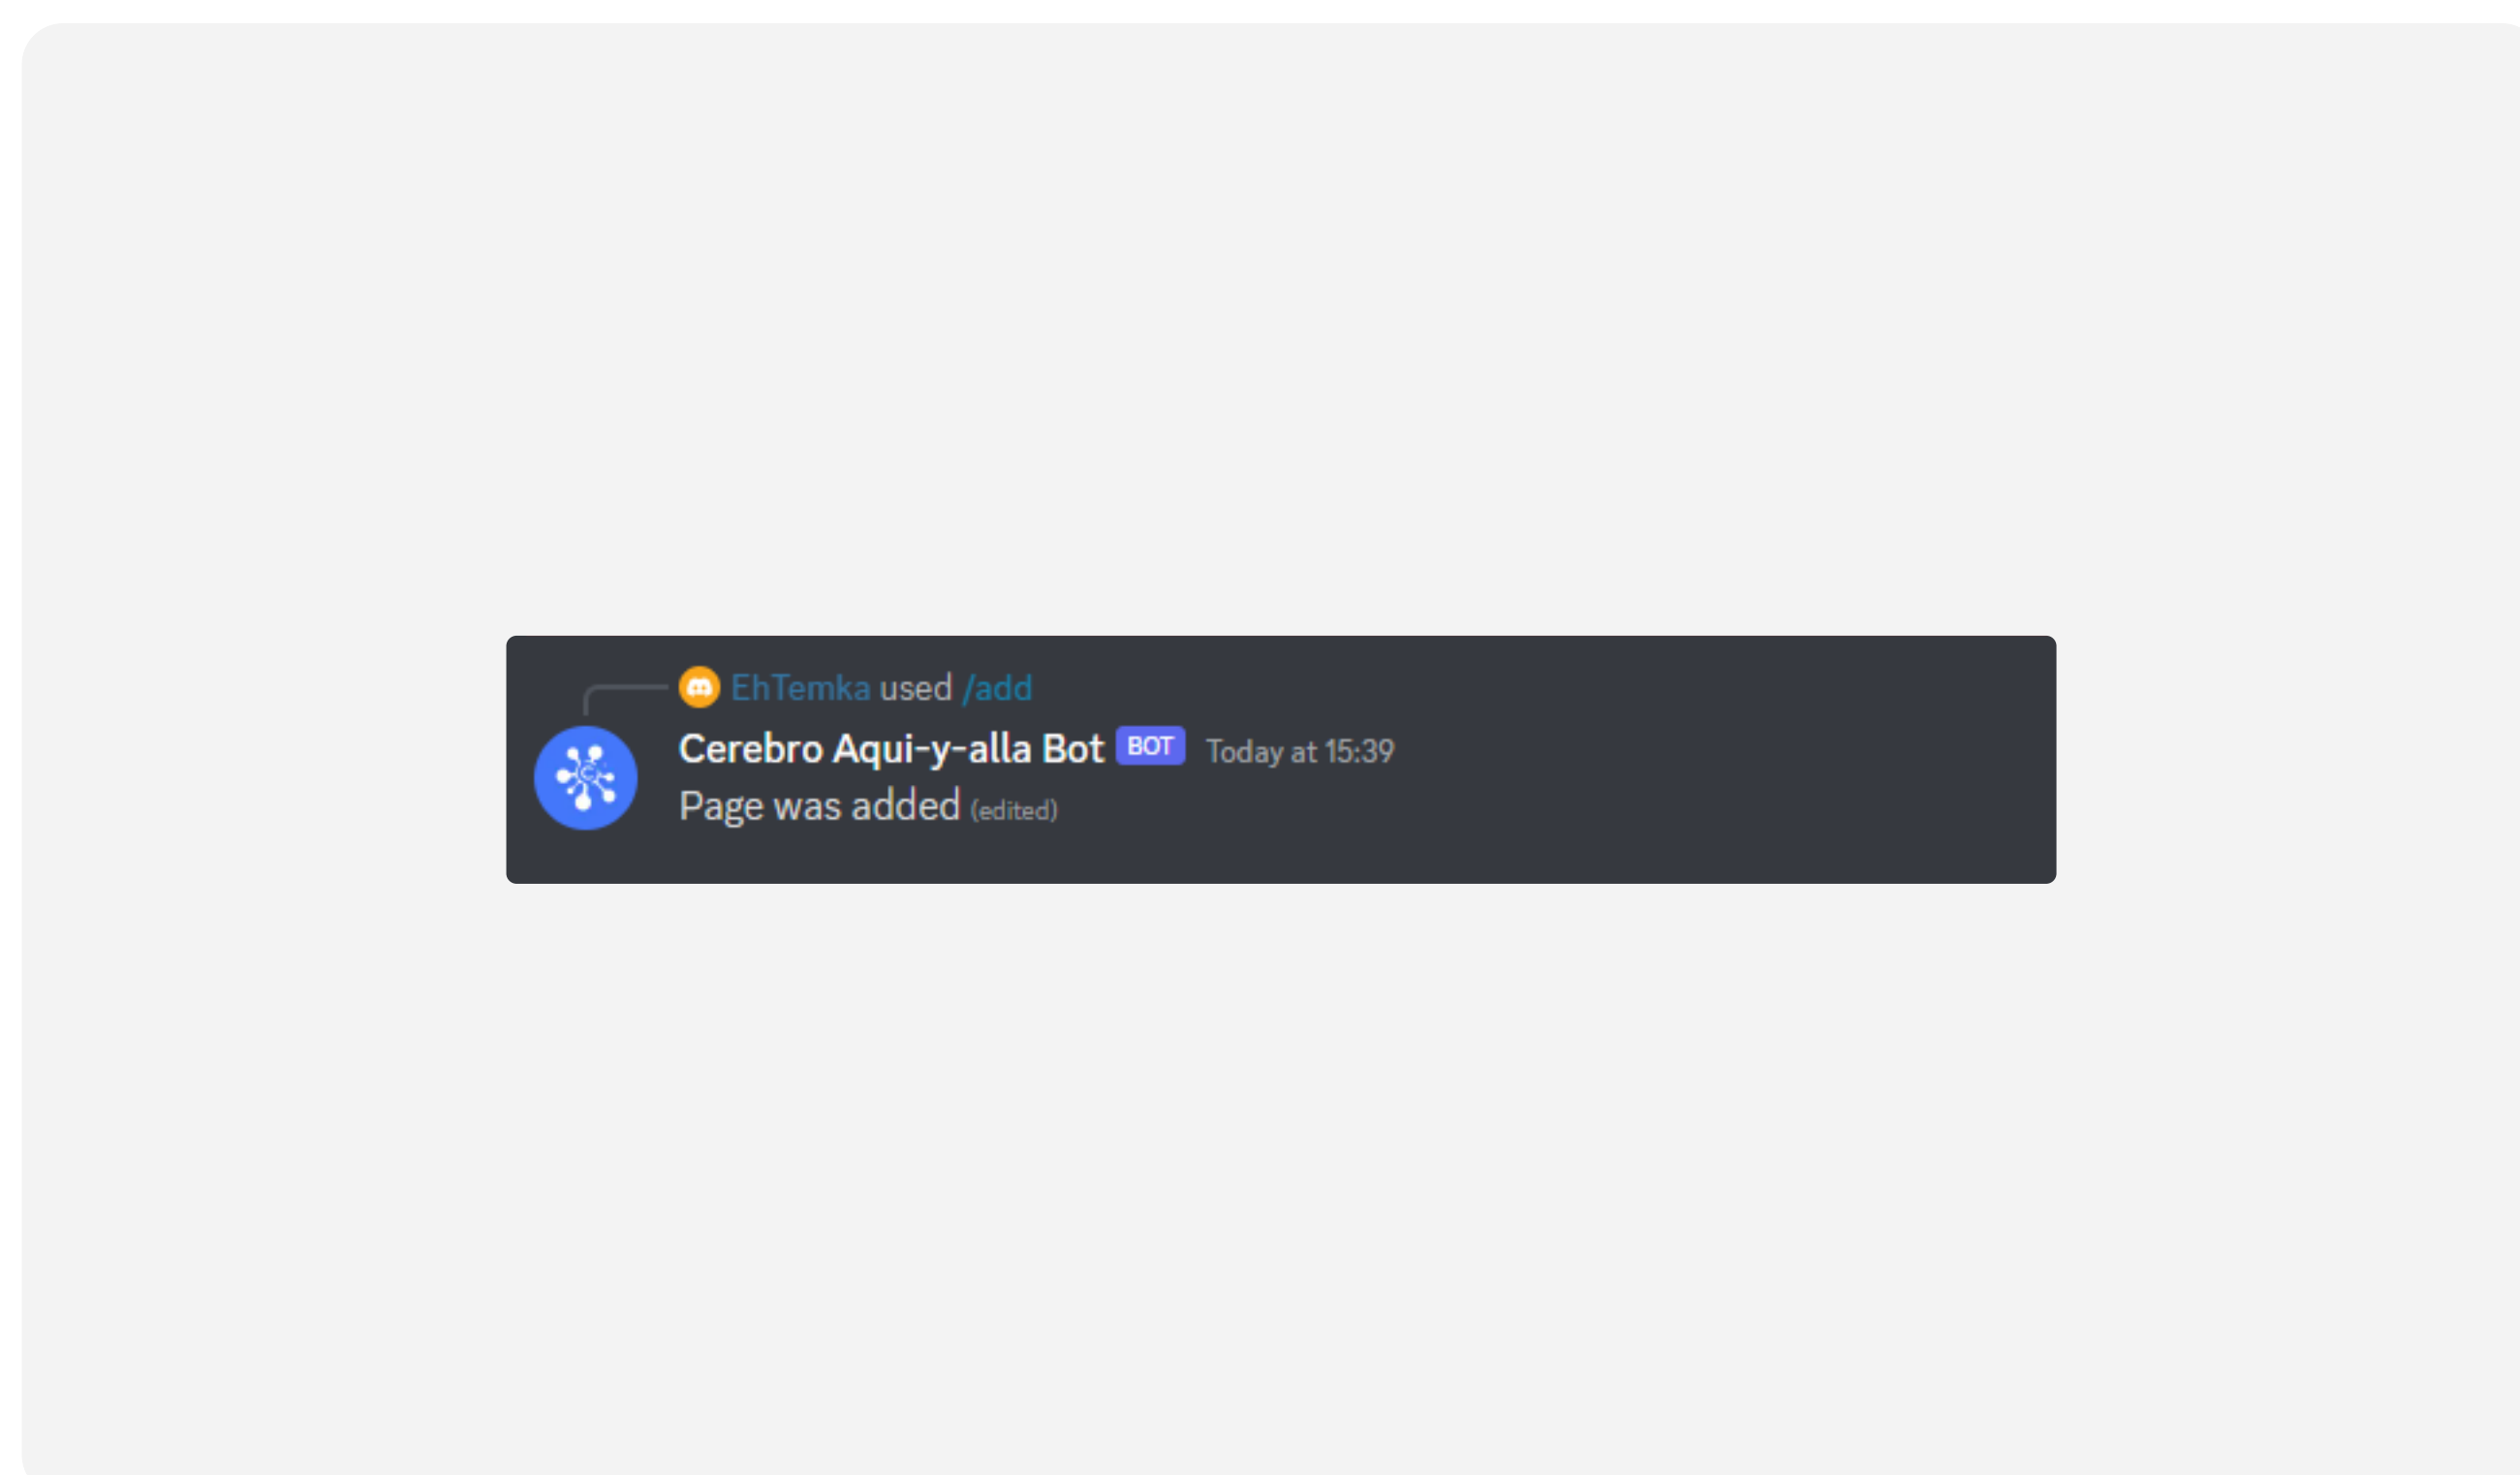

Note: you need to connect once, after that you can add tasks directly from Discord

In a private chat with the Cerebro bot in Discord, link your accounts. Use the `/login` command and specify the mailbox that is attached to the account in Cerebro

Copy the link to the My Space page, select the desired text chat and use the `/add` command with the link to add this page to the chat

You can start working after you get the notification that the task has been added
