

Select the required task and right-click or click on the panel to run *Task external chats command*

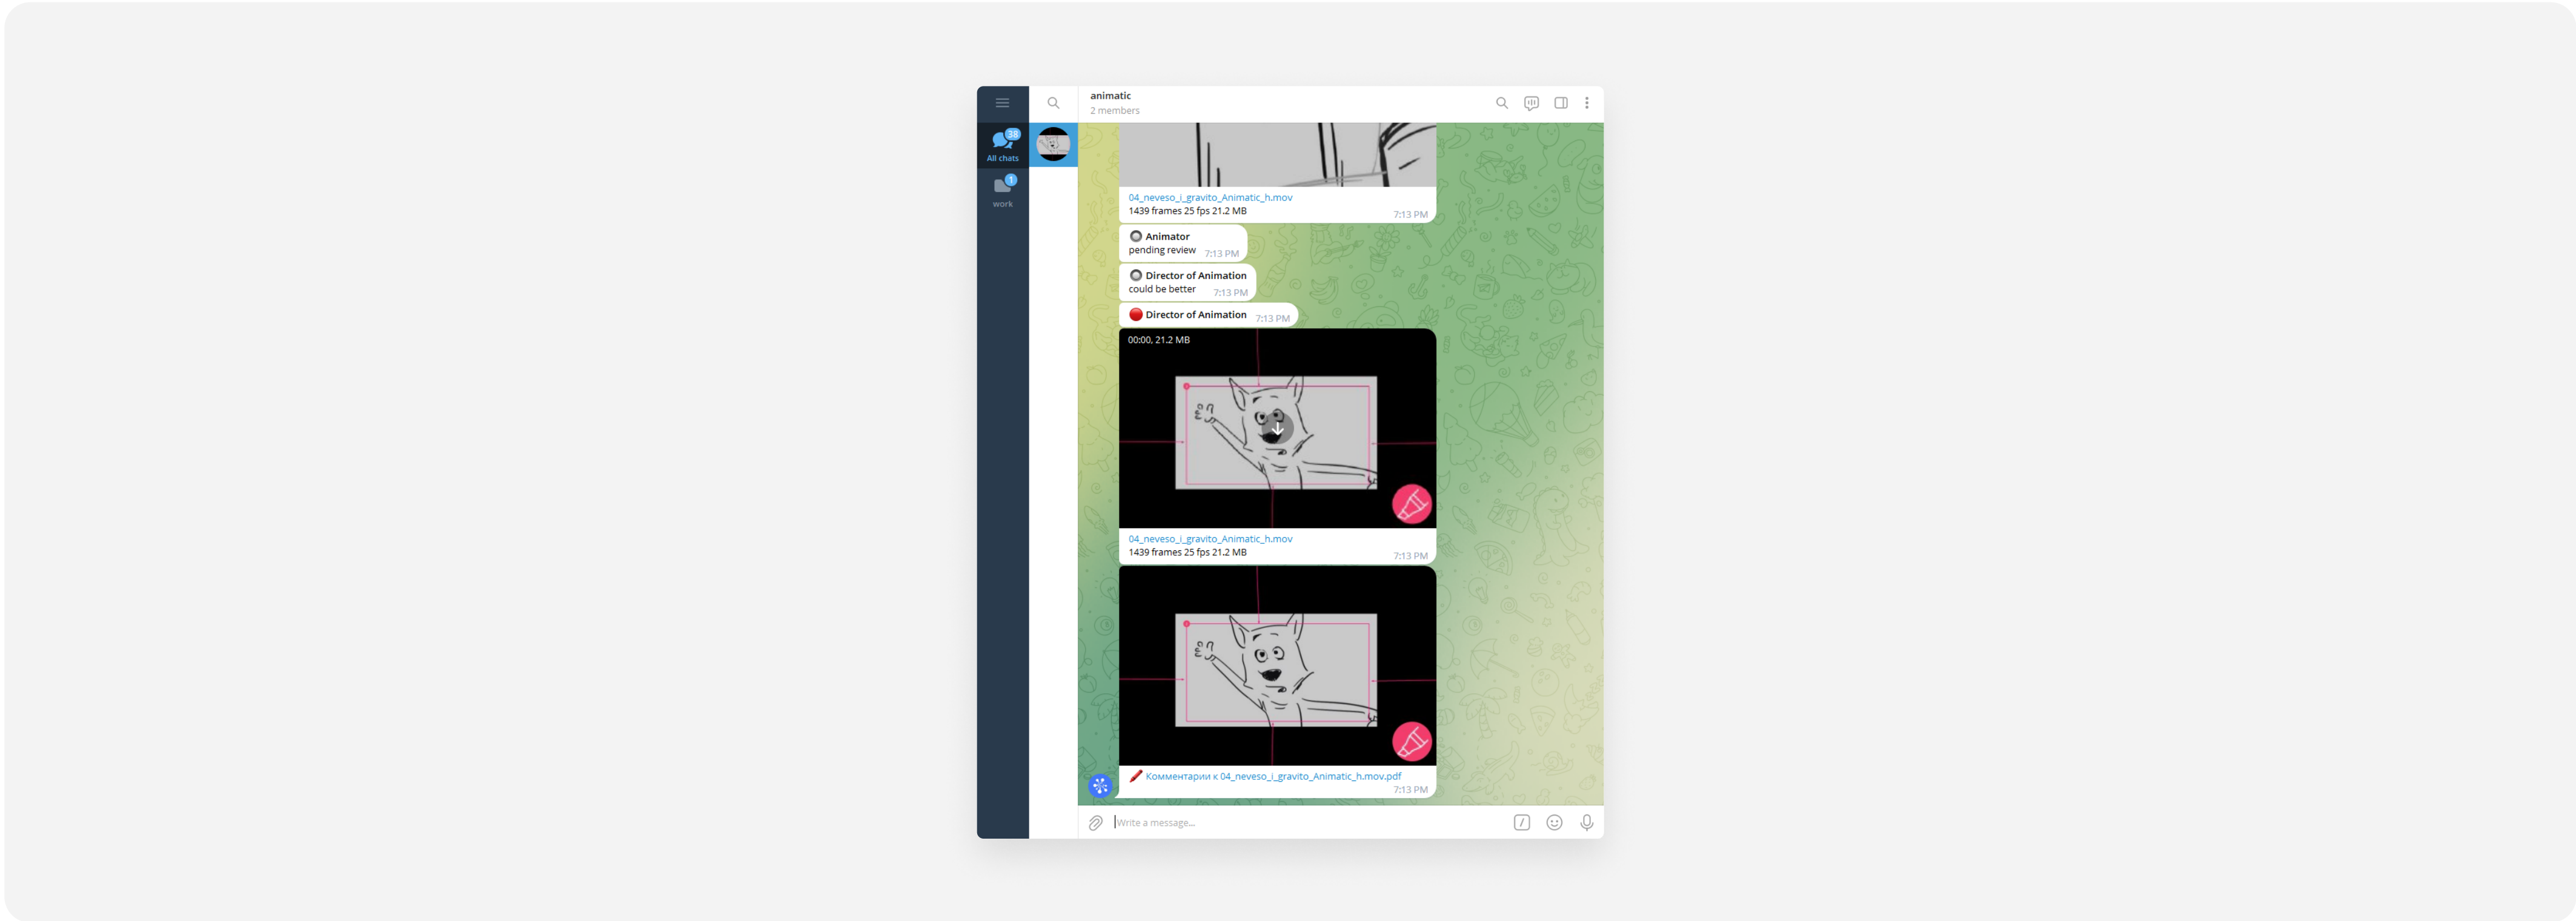

Select Telegram messenger. After that you need:

1. Create a new chat or select an existing one
2. Set the chat name
3. Add users
4. Decide if you stay in a chat after it's created. Then click *Create a Chat*

*Note:* to work, you will need [to link](#) your Cerebro profile with your Telegram account

After it is created, we will generate a link. You can send it to your colleagues to invite them to Telegram chat

Go to Telegram and open a task chat
