			Revert all settings to default values	

To display other task properties, click Settings. In this tab, you can select the list display mode: *Chips* or *List*. By clicking the *Select properties to display button*, you can select the items that will be displayed in the task property list. Here you can also determine the order in which the selected items are displayed. If you click on the Set *defaults* button, all settings will be reset.

To edit the values of task properties, you need to select them and enter the desired property value on the corresponding panel
